REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 2-8, 14-19, 22-26, 29, 31-34, and 36-39 are allowed over the prior art of

record. Claims 1, 9-13, 20, 21, 27, 28, 30, and 35 were canceled.

2. The following is an examiner's statement of reasons for allowance: The

Applicant's arguments filed on 3/30/2006 are persuasive. The Applicant has placed the

objected to subject matter as depending from a rejected base claim in independent

form, making it allowable. The feature of independent claims 2, 4, 6, 23, 25, 26, 29, 31,

32, 34, 36, 37, and 39 directed towards allowable subject matter are the mutually

different polarities in combination with the specific semiconductor device characteristics.

The feature of independent claims 14 and 15 directed towards allowable subject matter

are the same polarity feature in combination with the specific semiconductor device

characteristics. These features in combination with the other limitations of the claims

makes them allowable over the prior art of record. Ino et al. generally teaches of a

liquid crystal matrix display having a series of drive switches but is lacking drive polarity

configuration and semiconductor device characteristics. Therefore said features in

combination with the other limitations of the above independent claims are found

allowable over the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later

than the payment of the issue fee and, to avoid processing delays, should preferably
